

Consent to Treat Minors

Patients under the age of 18 are considered minors and must have the written consent of a parent or legal guardian to receive medical care by any physician associated with our practice.

To avoid confusion, our office requires the following:

- A parent or legal guardian be present at the first appointment
- Proof of Legal Guardianship at the initial appointment
- Written authorization for any other caregiver/relative to consent to subsequent treatment without the parent or legal guardian present
- A parent or legal guardian to consent for major surgical procedures

The Authorization to Treat Minor Patient in Absence of Parent/Guardian Form can be located on our website (www.tulsafoot.com) or at any office location.
